Upgrading to Windows 11, Step-by-Step

Windows 10 22H2

Windows 11 22H2

Future Windows 11 additions and new features

## Glynn's Windows 10 to Windows 11 Migration, Step-by-Step

1. Print Belarc report of your W10 computer
2. Review installed software list, decide which apps you want to transfer to W11
3. Locate and have at hand the license information and installation keys
4. Make a full separate backup of your Windows 10 system and label appropriately
5. Backup the settings files for apps that have that feature
  - Outlook SIGNATURE files
  - 3<sup>rd</sup> party apps
6. Print a screenshot of your Windows 10 Desktop(s)
7. Download W11 installation media and create a bootable flash drive
8. Shut down computer, remove old system drive, install new SSD
9. Power on computer, boot from flash drive, install W11 on SSD
10. Use your Microsoft account so that OneDrive files and Microsoft apps download automatically
11. Install 3<sup>rd</sup> party apps, activate licenses, restore app settings
12. Restore documents, photos, music, videos from backup to SSD
13. Test each app to assure proper operation
14. Backup computer
15. Run Belarc and save report
