Windows 10 / 11 Photos app

- Gallery View
- Editor View
 - Crop / Straighten
 - Lighting Effects
 - Filters / Autocorrect

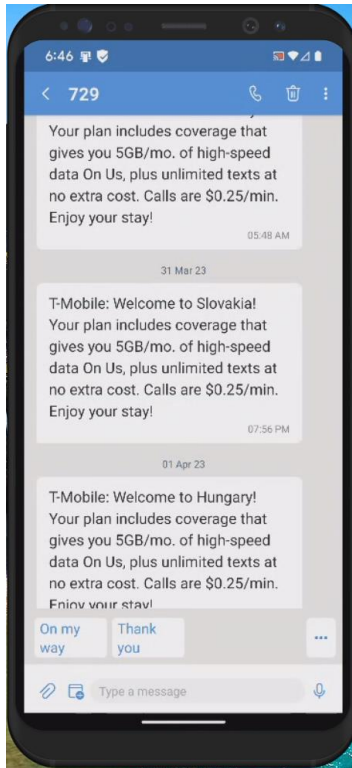

This is the set up I used on the cruise:

During the day, I took pictures with the cellphone.

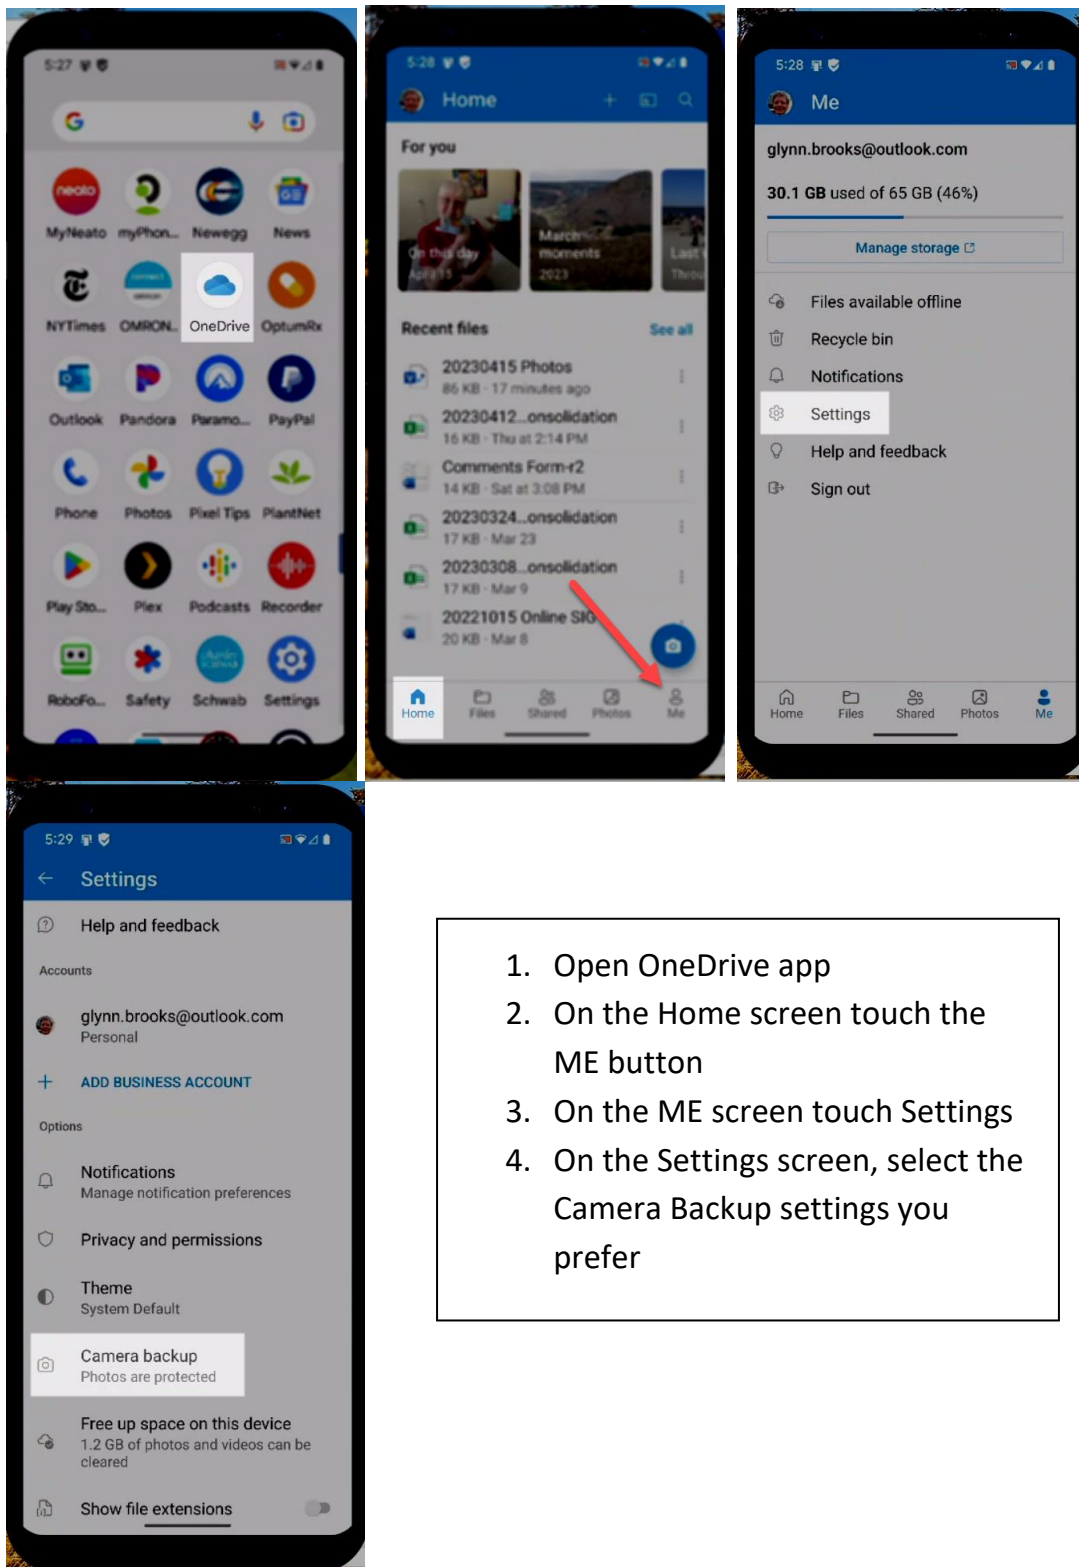

OneDrive automatically backed up the photos whenever I was connected to Wi-Fi

In the evenings, I used a laptop to edit photos, saving results to OneDrive. I posted a few photos to Facebook and emailed or texted a few to friends who do not use Facebook.

I also used Wi-Fi calling on the ship so that phone calls did not trigger roaming charges.

Every time the ship moved to a new country, I got a text message from T-Mobile about roaming charges

1. Open OneDrive app
2. On the Home screen touch the ME button
3. On the ME screen touch Settings
4. On the Settings screen, select the Camera Backup settings you prefer

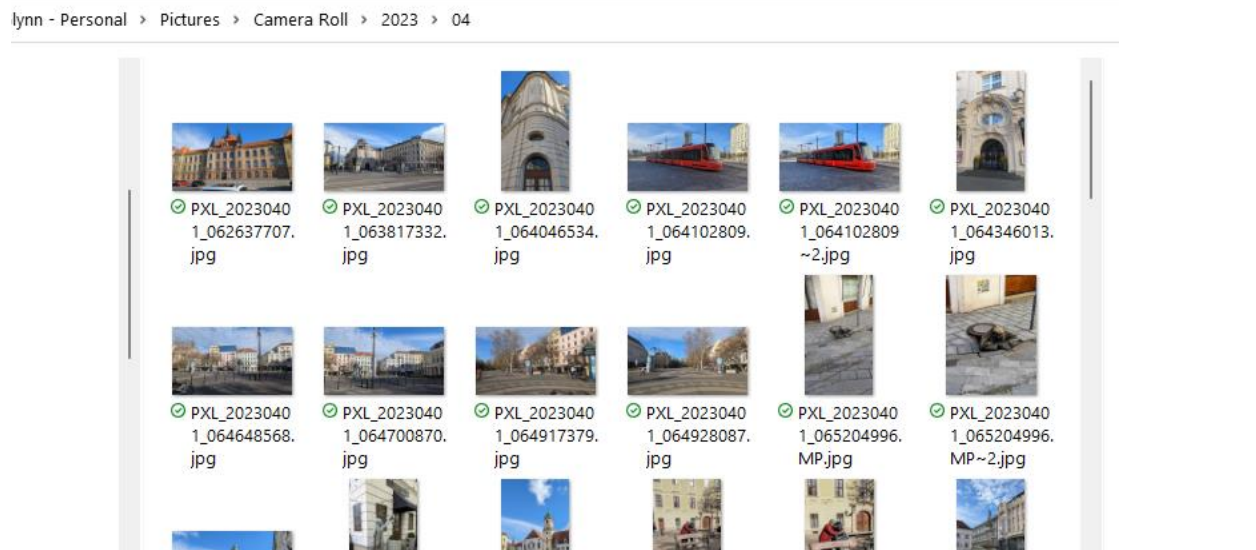

By default OneDrive puts all photos in the Pictures\Camera Roll folder.

To help you find photos later, I recommend you create folders within the Camera Roll folder:

> Glynn - Personal > Pictures > Camera Roll > 2023 >

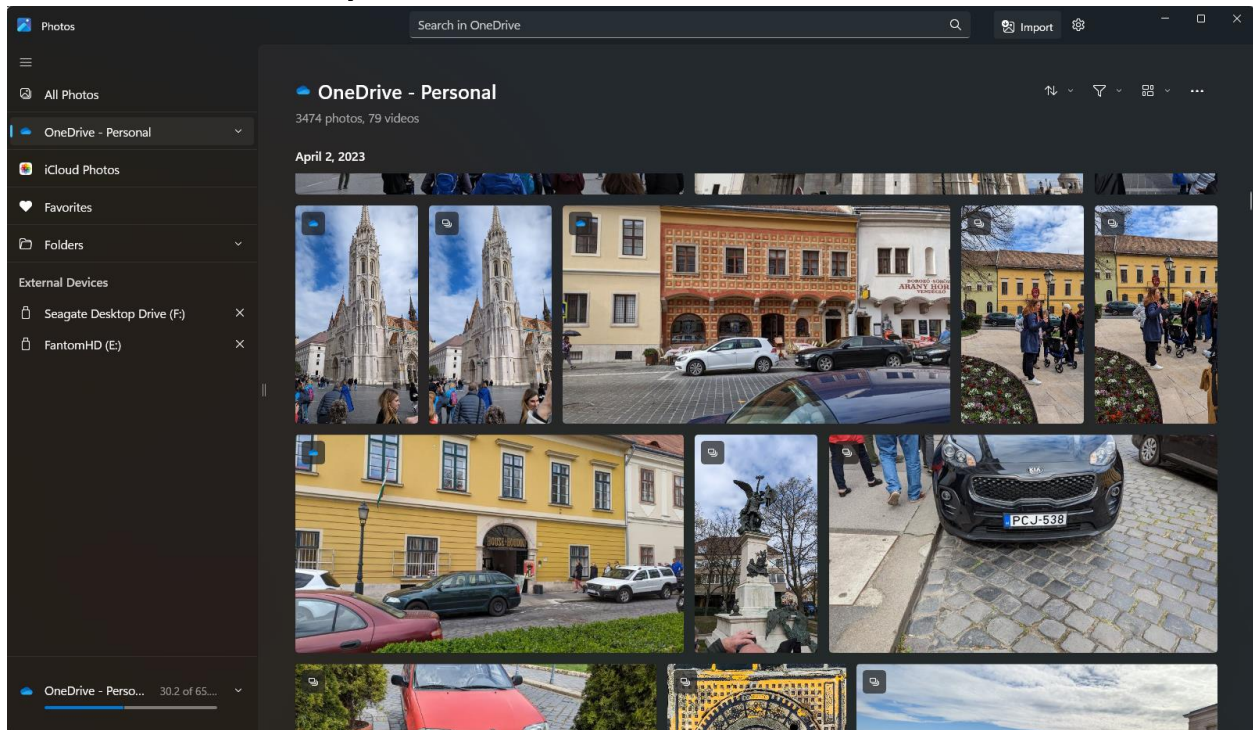

| Name | Status | Date modified | Type |
|------|--------|-------------------|-------------|
| 01 | ✓ | 4/5/2023 5:03 AM | File folder |
| 02 | ✓ | 4/5/2023 5:04 AM | File folder |
| 03 | ☁ | 4/5/2023 5:05 AM | File folder |
| 04 | ✓ | 4/14/2023 9:29 AM | File folder |

Windows 10 / 11 Photos app

- Gallery View
- Editor View
 - Crop / Straighten
 - Lighting Effects
 - Filters / Autocorrect

Gallery View

Double-click a photo to open Editor View

In Editor View you have access to all of the photo correction and enhancement controls

L to R: Edit button, Rotate button, Delete, Favorite, Information, Share
