## Prez Sez

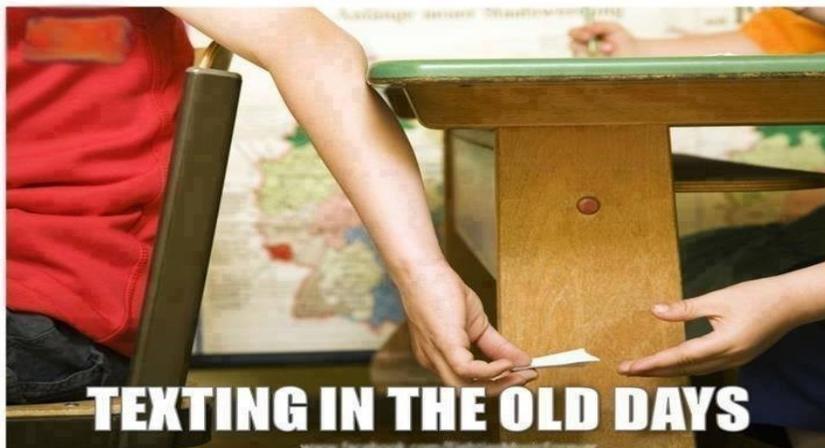

GUSTO is a group comprised mostly of older, predominantly male members and friend of King of glory Lutheran church. They want NTPCUG to teach two three-hour sessions on basic computer usage. The date are: Saturday, September 27th (1-4 pm) and Saturday, October 4th (9am-12pm). As I see it, the classes need not be restricted to GUSTO, KOG members or men.

NTPCUG contact with GUSTO is Alan Lummus ([alan@alummus.com](mailto:alan@alummus.com)). I'm guessing the skills we need to teach include email, browsing and elementary word processing. I would suppose that some will need help with basic setup, registering accounts, connecting to the KOG network, etc. We need someone to run this project and enlist helpers. We need helpers who can meet the schedule and provide help for the beginners. I'd hope we could provide a helper for every 3-4 students.

My phone number is 214-808-9981. My email is [bill@Drissel.us](mailto:bill@Drissel.us). Start the subject of your email with "TTT".

I believe this project will be a rewarding experience for all—including the helpers.

I expect to attend our monthly meetings...talk to me if you are interested.

-----  
**Special Thanks to those that help put this newsletter together and edit the content:**

- **David Franke**
- **Joli Ballew**

# Special Interest Groups (SIGs) ...

Sessions with presentations, discussion, and exchanges of information

All SIG meetings at King of Glory Lutheran Church, 6411 LBJ Fwy in Dallas (between Preston & Hillcrest, north side of LBJ), normally the third Saturday of each month.

## HTPC/Home Automation SIG – 8:00 am

Home Theater (or Media) PCs and Home Automation come in an endless range of capability, complexity and price. It may just be setting the home thermostat remotely, routing audio and/or video to different rooms, or performing other, similar tasks. Come join us as we cover this new & exciting area.

Alan Lummus  
Alan@bkmts.com

## Making Money on the Internet — 9:00 am

July is the 3rd of our 3-4 month exploration and demonstration of WordPress. We've completed the installation of a basic WordPress site on WordPress.com and are in the process of completing a WordPress installation on a contracted third party host, [1and1.com](http://1and1.com). This month we'll complete the installation on the hosted server, link the database, and get both sites fully functional. Then we'll begin adjusting the look and feel of each site according to our taste through selection of and modifications to the theme. As time allows, we'll discuss a number of plugin options as we complete a comparison of .COM and .ORG versions of WordPress and build out our sites. Bring your experience, suggestions and questions, and we'll learn together.

**Customer:** *I can't get on the Internet.*  
**Tech support:** *Are you sure you used the right password?*  
**Customer:** *Yes, I'm sure. I saw my colleague do it.*  
**Tech support:** *Can you tell me what the password was?*  
**Customer:** Five dots.

## Digital Photo Editing Software — 11:00 am

Since speed is always an important issue with photo capture— so it also is with editing for publishing our work.

We can now obtain upgrades for software to use computers providing 64-bit performance.

This pleases us with our routine singles and can make our videos less tiresome too. I do not update or upgrade my editors often, but now with all my machines capable of 64-bit word processing, it is time.

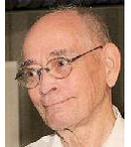

One of my recent problems was handling over 100 images without overloading system capability. I will forward for my newer software versions.

Have any of you used your face recognition capabilities to an advantage?

Come tell us how easily you solved your recent problems.

Bring your friends, beginners and advanced and enjoy learning and sharing.

Spike Smith, NCE  
harold.smith@ntpcug.org

## .NET Developers/HTML SIG - 10 am - 12 pm

Tuc Goodwin  
tgoodwin@ntpcug.org

Chris Morgan  
chris.morgan@ntpcug.org

### **Data**

There are many different types of data sources that we can use, and we need to know something about each of them.

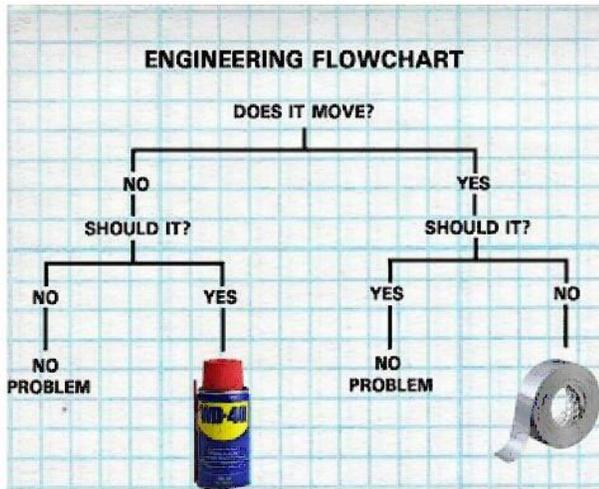

From simple text files to XML, Excel, databases and the Web, data is coming at you in a variety of formats and it helps to be able to recognize how to use each of these formats.

In addition to our database discussion, we will have a conversation on the future direction of the SIG.

**Internet — 11:00 am** Glynn Brooks  
glynn.brooks@ntpcug.org

Private cloud. Public Cloud. Hybrid Cloud. Cloud Services. What are they really? Why do you care? In our next meeting, we'll take a look at the various types of on-line services and figure out which ones help you with your backup needs, and how to share files with others. We'll also look at the service models and how they relate to the way you use Microsoft Office now and in the future.

**Digital Photography — 10:00 am**

Spike Smith, NCE  
spike@spike-info.com

The speed with newer digital cameras means more than just being able to shoot fast moving sports with ease. Developing better speed capabilities can make improvements that allow for faster auto focus, control of hue, reduce delays between exposures, make effective HDR less prone to error and so much more.

Early issues of mirrorless cameras with interchangeable lenses had lengthy delays for setups and between shots. Much of this was due analyzing data and painting images on a monitor. As monitors became larger, the delay increased. Have you seen improved performance with these cameras? Show and tell with us if you have.

Bring your problems and solutions to our meetings as—what we know we share, what we don't we learn.

Bring you friends and enjoy.

**Microsoft Access SIG —11:00 am**

Jim Wehe  
jimwehe@gmail.com

Larry Linson  
larry.linson2@ntpcug.org

On **July 19, 2014**, we plan three segments of our meeting:

- In the first segment, SIG Co-Leader **Larry Linson** will moderate a discussion of our plan for the SIG, in the form of an “About the Access SIG” brochure / pamphlet, documenting a bit of history; the original stated purpose, which still holds: “we will learn Access together”, some limitations on subject matter to be covered (no ‘web apps’), demonstrations by members and guests of Access databases they use; discussion and demonstration of Access developer tool software, related office software, and of competing products; addressing attendees’ questions and problems; and planned presentations for the near future.
- In the second segment, we will solicit questions, problems, and issues that attendees have with Access and attempt to answer or suggest sources for answers.
- In the third segment, if time permits, **Larry** will continue our discussion (perhaps augmented with some projections or demonstrations) of the **Elements of Access Queries**, focusing on what queries are, what kinds of queries there are, and what different kinds of queries can accomplish. Where possible, demonstrations will use actual data donated by our attendees.

**NTPCUG Member Susan Williams**, after her successful demonstration in **March, 2014** of her personal database for keeping track of Martin Luther King Memorabilia and other historical items, donated a sample of typical data items for us to analyze and use in our examples. **Thank you, Sue.** We’ve had comments from other attendees about how interesting they found your discussion of items in your da-

tabase (the data you were showing). **We encourage attendees to see if they have Access objects, especially data tables, that they can and will donate to the cause.**

From SIG Co-Leader **Larry Linson**: We offer many thanks to SIG Co-Leader **Jim Wehe**, Assistant SIG Leader **Neel Cotten** and Assistant SIG Leader **Kathy Lee Brown**. Jim's been a gracious host and leader, Neel has raised some provocative questions, and Kathy has been a mainstay in our technical discussions, providing advice, and answering questions. I also thank each member and guest who has attended, brought questions, and added comments – without you, there'd be no need for our SIG.

**Why you should join us:** If you have an Access application and need some guidance, assistance, or just encouragement, come to our meeting and let us know. If you have a need for a computer application, we may be able to help you determine whether Access is the right software to use. If you just wonder what Access database software is all about, we may be able to explain. We can't teach a "course" in just one hour per month, but we can discuss issues, advise on immediate problems, and identify resources you can use.

**Valuable prizes:** Prize drawings, a fixture of the Access SIG since 1993, will be "occasional" when we get something of value to give away. With different versions of Office being used by SIG attendees, copies of the databases used in demos aren't as useful as they once were, though the tables may transcend version differences. And, databases created in older versions (at least as old as Access 2002 and Access 2003) can be imported and run in newer versions. **Databases as old as Access 2000 can be run in newer versions.**

## Microsoft Application Development Study Group SIG - 1:30 pm

Tom Perkins  
tomperki@gmail.com

Entity Framework Code First Tutorial.

This week we'll begin a hands-on walkthrough of a fairly comprehensive tutorial to build a web application for Contoso university. The user can enter and update student, course, and instructor information, Complementing a presentation by Chris Morgan in the .NET SIG Saturday morning, the development process will use an Entity Framework Code First approach with MVC.

The software versions used in the walkthrough will include:

- Visual Studio 2013 or VS 2013 Express for Web or Visual Studio 12
- .NET 4.5
- Entity Framework 6.0 (will be loaded as part of the tutorial)
- Windows Azure SDK 2.2 (optional)

Questions or comments?

Contact Tom Perkins (tomperki@gmail.com) or Chris Morgan (chris.morgan@ntpcug.org)

## Microsoft Excel – 8:00 am

Frank Tubbs, SIG leader  
ftubbs@sbcglobal.net

TBD

**Tech support:** How may I help you?

**Customer:** I'm writing my first email.

**Tech support:** OK, and what seems to be the problem?

**Customer:** Well, I have the letter 'a' in the address, but how do I get the little circle around it?

## Salesforce.com – 11:00 am; 12:30 pm

Salesforce.com offers two major certifications for Force.com Developers: The Developer Certification (DEV401) and the Advanced Developer Certification, (DEV501).

Dallas Salesforce Developers Group is pleased to offer FREE classes each year to candidates.

All, remember, this is the study group for 401 and 501 (aka the study group). Not to be confused with our 4th Wednesday meeting held at the Improving Enterprise (which is more mischief, no studying). The objective is for each of us to take the respective exams at the end of the sessions, so we will keep up the pace. Ask questions. These are not easy exams, but I am convinced that we can get everyone past the finish line.

## Powershell – 8:00 am - 10:00 am

Larry Weiss  
lfw@airmail.net

Josh Miller  
jmiller76@gmail.com

**Josh Miller** will present "PowerShell Best Practices"

From 8-9 am we will have an informal hour and from 9-10 am we will have the presentation.

## Windows Tips & Tricks — 9:00 - 10:00 am

Chuck Stark  
chuck.stark@ntpcug.org

Gil Brand  
gbrand@ntpcug.org

Open Q&A this month. And if you have a troubled system, contact Chuck or Gil for a possible 'live, no net' troubleshooting session.

**Tech support:** *What anti-virus program do you use?*

**Customer:** *Netscape.*

**Tech support:** *That's not an anti-virus program.*

**Customer:** *Oh, sorry... Internet Explorer..*

## Windows Inside Out — 12:30 pm

Glynn Brooks  
glynn.brooks@ntpcug.org

In this session, we'll look at all the ways Windows 8.1 helps you connect to, manage, and share your data with others. We'll also look at several online storage offers and compare them in terms of the amount of free storage, security, convenience and file sharing capabilities. We'll also look at Windows 8.1 OneDrive integration, and how to control the settings that are synchronized to your Microsoft account.

## Wireless Communications — 12:30 pm

Birl Smith  
birl.smith@ntpcug.org

TBD

## Word — 10:00 am

Sharon Dorsey  
Sharon.Dorsey@ntpcug.org

### **Word 2010 – Open Demonstration**

What do **YOU** create in Word? Other than letters, what do you use Word for?

At the July meeting, we will have an open discussion about the various uses of Word. Here's an opportunity to have me create a word document from scratch based on **YOUR** input. Even if we don't have time to finish a complete document, you will go home with concrete ideas of how to accomplish a specific function or two.

This is a group participation project, so come with questions and suggestions.

## Investors - 1:30 pm

Gil Brand  
gbrand@ntpcug.org

We will have our usual Q&A session. Bring your questions and experiences in investing and share with the group.

# Access News from the Northwest

---

By Teresa Hennig

## *News from the Northwest*

*By Teresa Hennig*

*Microsoft MVP for Access (2005-2014), President of the Seattle Access Group and Pacific Northwest Access Developers, INETA Community Champion (2008 and 2011), and member of the North Texas PC User Group since 2008*

## **Downloads, Links and Other Resources**

### **Digital Copyright Template by Tech Pro Research (March 2014)**

We are awash with digital programs and content to support always-on connectivity, the blending of consumer/business devices and increased local/remote storage capacities. The Tech Pro Research digital copyright policy will help organizations seeking to set guidelines for digital programs and content.

<http://www.techproresearch.com/downloads/digital-copyright-policy/>

### **Right Click Context Menus - Creating Custom Command Bars (Sept 2013)**

- **Add-in Express** provides a free tool that allows you to view available commands and place them on custom command bars (aka popups, toolbars ...) <http://www.add-in-express.com/products/commandbars-controls-ids.php>

You will likely find Microsoft's help file to be an invaluable resource.

### **Office Fluent User Interface Control Identifiers**

<http://www.microsoft.com/en-us/download/details.aspx?id=6627>

### **Access MVPs – Sharing code and resources**

Several Access MVP are sharing resources and links through the website hosted by Arvin Meyer. You will find the tools offered during Crystal's presentation on her page. [www.AccessMVP.com](http://www.AccessMVP.com)

**Doug Steele**, Access MVP and author of "Access Solutions" shares tips and links to other resources. <http://www.accessmvp.com/djsteele/AccessIndex.html>

### **Access Blog – by the Access Team --- one of the top blogs on MSDN!!!**

Stay tuned to the community ... The team shares insights into their schedule, their favorite features, new features and how to use them. This is also an ideal avenue for the team to talk about issues that are of interest to the Access community. You'll learn about the people and some of the factors that are helping to shape the future of Access. Whether you're a seasoned developer or just learning about Access, you'll find invaluable information and techniques. From creating a database template to getting help when you need it, The Access Blog covers the gamut. <http://blogs.office.com/b/microsoft-access>

### **A couple of good sites to search for information and programming assistance**

[www.mvps.org](http://www.mvps.org) and [Office Developer Center on MSDN](http://www.office-developer-center.com). And, we've been mentioning the news-groups. You can search and drill through thousands of threads. Visit <http://search.microsoft.com/en-us/CommunityResults.aspx?q=office%20community> to search through Microsoft community and support options.

### Utter Access Discussion Forum

Touted as the number one Access community forum! This may be a great place to get answers to your questions. And, you'll see several familiar names as some of our members are prolific posters. Hey, there are even photos from the MVP Summit, so check it out!

[www.utteraccess.com/forums/index.php](http://www.utteraccess.com/forums/index.php)

### A compilation of links to Access Resources

This site provides an impressive array of links to a variety of resources for Access developers and users. [www.cbel.com/ms\\_access/](http://www.cbel.com/ms_access/)

### Access Developer Portal MSDN

Database samples and tutorials provided by Access MVP and other experts.

<http://msdn2.microsoft.com/en-us/office/aa905400.aspx>

### Database Issue Checker

Access MVP, Allen Browne offer tips and utilities for casual users through expert developers. The Issue Checker can be used during development or to trouble shoot legacy files. Allen's site provides a host of other tips and resources, including a compilation of reserved words. <http://allenbrowne.com/> or <http://allenbrowne.com/AppIssueChecker.html> ..

## NTPCUG Member Websites

---

Are you an NTPCUG member? Do you have a website that you would like to share with other members? Here is your opportunity to publicize your hobby, personal interests or a business.

NTPCUG now permits each member to post their name along with one website at [www.NTPCUG.org](http://www.NTPCUG.org) and in our newsletter. Member links to be posted are subject to Board approval, and cannot contain inappropriate content or promote illegal activities – all the usual conditions that responsible persons expect. Send us your links now!

If you wish to post as shown above, just e-mail [webmaster@ntpcug.org](mailto:webmaster@ntpcug.org) with your name, member number and the URL of your desired website. We'll post your name and URL on our website and in the newsletter for as long as your membership remains current.

Here are our current member sites:

# Digital Photography – Tips and Tricks

By Spike Smith

## **Wedding Photographer Wannabe? Part Two**

Part One of the series provided an introduction and how tips have evolved through the years. Wedding photography strongly documents social lives as it documents this divine partnership of wedlock beginning a strong element of permanence.

When we launch wedding photography as a new enterprise or just helping solve the budgets of close friends and relatives, this activity will cost a substantial sum. When I was learning the necessities involved and progressing to the point where I knew what I was doing right, there was notice of this outstanding intangible asset. One that offsets the substantive buildup costs and even shines above making a nice profit. This delightful and comfortable intangibility is the overpowering beauty throughout. The bride is having her finest coiffure and is wearing her exquisite gown. The groom may not have worn a necktie for months, but on this day he is the best dressed and most handsome gentleman of the day. Just about everyone in attendance is looking extraordinarily beautiful or handsome. Friends and relatives are all decked out in their finest. This outstanding display of a once in a lifetime grandeur also becomes a great pleasure just to be a part of the event.

Oh, oh! Are we jumping ahead too rapidly? Aren't individuals allowed to have their own nemesis and not be perfect in all other's eyes? Well yes, that is so but on this day – the bride is right and is forgiven for those tantrums and perhaps insinuations against you and the other help. Let it be said that this is her day. (Tomorrow, it's back to near normal and you no longer accept it was all your fault that she stepped on her own gown and tripped getting into the limo.)

You will still continue to feel great about being a part of this success.

When a contract (or friendly family agreement is reached) one has a master checklist to ensure order is maintained throughout until delivery of goods and payment received. For those beginning wedding photographers getting experience, you will likely find yourselves doing everything including being advisor. You may have an advantage here.

You must visit the locations so you will know your way around, who's in charge of the facility, and what are the established rules for the church and officials. When you go to look the sites over you should bring a camera along. A point and shoot setup is in order as the family might say they want a picture at that lovely exit. Yes, and as you look where the bride and participants pass through, the predominant standout must not look like this.

**[do not overlook signage]**

**EXIT**

**USE IN CASE OF FIRE**

**or PUT TRASH HERE**

We work around and note positioning so as not to artistically legitimize those ubiquitous objects. Be sure your assistant is aware of this observation.

Find that grand aisle where the parading will follow. Arrange a firm spot for you, or better yet, your fine assistant so as to have this position reserved for allowing a perfect lens eye view of each

individual in the show.

You will need a long lens for yourself to be out of the way for the ceremony and yet capture all pertinent details. NO CLICK-SILENCE!

The cost effectiveness of modern digital capture now shows itself. With your fast recovery camera setups, quiet operation, no cost for deletes, and possibly protection against an eye closing. Take duplicate shots—just in case.

Have you learned how to use HDR (High Dynamic Range)? It may work wonders on a few of those group shots or when a wide range including objects and scenes are important with the subjects.

We have taken so many shots with our older cameras and even with fast film we required a flash. You may too! As a point of interest, I remember the last time I shot over a hundred images at a single location. Each was taken with very high ISO (digital sensor speed) and the color was fine, no blurring, and minimal delay between shots. You will need to check out your gear to ensure it is advanced enough for this, otherwise you will need flash. (Did the Priest or minister edict that there may be no flash during ceremony?) I trust you are constantly checking out your cameras' limitations.

One fine advantage to using existing light and high ISO settings will allow eliminating those troublesome shadows caused by the flash.

The wedding cake cutting ceremony is a must for documenting. It often may end up in an awkward spot for everyone. See if this can be worked out early.

Bride gets her cake, groom gets served his by bride. Great!

Now for the no-no! Some people love to see cake shoved in brides face and bride smearing cake all over that grooms black coat and tie. It should be your duty to never suggest such antics. Don't insinuate its existence. We don't want to instantly create an irate bride and groom. Let's keep all happy and showing love. Now is a great time to bring the starring couple closer to the dance floor.

About that [first dance](#) –

The band may not know better that this number one dance is for the newlyweds. Afterward they can bring family and others into the dance. (Send assistant to make sure band knows who is on first. You rush in and get the time-honored shots of B & G and fathers and mothers.

The dance floor will then get very crowded but get as many happy couples as you and your assistant can. Wander around and get those charming guests at their dining tables too. Did you get acquainted with a couple of guests close to the newlyweds. Ask them just who we had better not leave out.

That garter toss is often cute. It is unpredictable though. You and your partner just align yourselves to catch that elusive projectile looking for the next bride-to-be.

The third issue will get into finances, profits, unsavory persons working to steal pictures without payment. Also, low-cost protection against lawsuits and non-payment. You may also look for those mistakes yours truly made which you can avoid.

Updated digital cameras are emphasized along with photo techniques. Those ever important check lists are numerous and will be documented as attachments on our Digital Photo Web Page.

Remember, the inherent beauty working with a wedding shoot does provide us with that tranquility of being a part a wonderful event.

# Monthly NTPCUG Meeting Flyer – Can You Help Distribute?

---

Each month, we send members a flyer listing the upcoming second and third Saturday SIG meeting information. We work to fit it all on one page so it can be easily printed and posted in offices and public areas. It can also be sent by email to family members, friends, colleagues, etc.

With your help we hope to generate increased interest in User Group activities, thereby helping us grow. We rely on members, SIG leaders, Board members and volunteers to share this information with others. We also need you to consider new options beyond the obvious – bulletin boards, etc.

We ask you, our members, to think of places where you can post the monthly flyer and to e-mail it to anyone you know who may be interested.

We try mightily to get this out before the weekend preceding the second Saturday of each month so you have time to “do your thing”.

With your help we can grow our Group and reach others who can **“Share what you know, learn what you don’t.”**

**Where have you sent the July flyer?**

# Volunteering

---

Every board member, officer, chairman, and SIG leader is a volunteer. No one in this organization receives any payment for their work. Without our volunteers, NTPCUG would not exist.

Please consider volunteering for one of these important jobs:

## Information Desk — Charles Rem

*crem@ntpcug.org*

Assist with check-in process at 3rd Saturday. One or more hours, even periodically, will make a difference.

***This is an ongoing need. YOU can help, and it’s not difficult. Training provided, so you really have no excuse not to assist - right?***

## Mentoring — Tom Sweet

*tom.sweet@ntpcug.org*

Communicate with new members to ensure they are aware of the benefits, SIG opportunities and help them in numerous ways to feel welcome and to know that we care about them.

## Newsletter — Doug Gorrie, David Franke

*doug.gorrie@ntpcug.org*

*davef81@gmail.com*

We need someone to step forward to help request and collect articles from SIG Leaders for the monthly flyer and the newsletter. No experience required -- training provided.

# Renew Your NTPCUG Membership For “FREE”?

---

The Board has established a new NTPCUG benefit that permits renewing of memberships without the usual membership fee.

Simply put, any member that writes three articles for our newsletter, subject to the following criteria, can renew without cost. In this manner, we are encouraging our membership to share their expertise with other members, as well as providing an opportunity for members to re-search issues and share the results with others.

The current requirements for the program are as follows:

1. You must be a current member.
2. Requires at least three articles/year, submitted during the member's current membership year.
3. Articles must be at least a couple pages long in the newsletter, excluding any pictures, diagrams, etc. NOTE that the length is determined after editing, if needed.
4. Longer articles may be broken up across two months, and consideration will be given to counting it as TWO articles. However, length by itself may not count as more than one – it's meaningful content we're after.
5. Articles must be submitted at least two weeks prior to publication to allow time to review/edit. However, if the content is clean and readily understood, and requires only minimal review, and we have time to go over it, we might take it with less notice.
6. No plagiarizing, except for "small" amounts where credit is given to the actual author or source.
7. Articles must be relative to the goals and topics of our User Group. If in doubt, check with the Editor before writing it up.
8. At time of membership expiration, it is the member's responsibility to contact the Editor to request that their membership be extended, and list the months in which their articles appeared. We will confirm the details and have the Membership chairman extend you another year.

Please give this new program some thought, and come up with some good material we can use. Share your knowledge, in line with our motto –

***“Share what you know, learn what you don’t.”***

# NTPCUG NEWSLETTER AD RATES AND DESCRIPTION

---

Paid advertising is available within the North Texas PC News at reasonable rates. The online Newsletter is published monthly and is distributed in PDF format to approximately 200 registered members.

SIZE	Price / One Issue	Price Each - Six Issues
Full Page	\$120	\$ 85
Half Page (vertical)	\$ 75	\$ 65
Half Page (horizontal)	\$ 75	\$ 65
Quarter Page	\$ 50	\$ 40
Business Card	\$ 35	\$ 25
NTPCUG Members	Half Price	

## Policies & Mechanicals

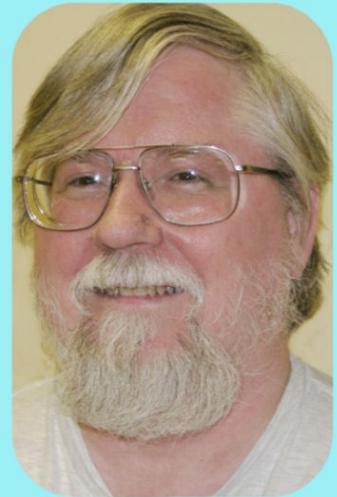

- Commercial ads –
  - o repro form, final size, ready for printing
  - o JPEG or approved format
  - o 300 DPI minimum
- Text ads should follow most commonly used font styles
- No ads on front page
- Related only; suitable at discretion of NTPCUG
- Payment in advance
- Send requests for information, contacts, or orders to: [Advertising@ntpcug.org](mailto:Advertising@ntpcug.org)
